Husky Equipment has been manufacturing telescopic spreader bars, in central California, since 2005. Our engineered bars are designed and built to be compliant with ASME B30.2-2010 and ASME BTH-1-2011. They are in use by contractors, municipalities, and crane companies all across the United States. With capacities from 15 Ton to 90 Ton and telescopic lengths up to 30 feet Husky Equipment is sure to have a spreader bar to fit your company's needs.
